

# Touch Screen

Bcn (SP) Oct/14<sup>th</sup>/2014

## **PR - 25 words**

ALBEDO telecom announces all instruments manufactured in the hand-held mini platform, adopted touch-screen technology.

## **PR - 50 words**

All hand-held instruments (including AT-2048, Net.Shark, Net.Hunter, Net.Storm, Ether.Giga, Ether.Sync, Ether.Genius) will adopt immediately the touch-screen technology. From now on new customers will be able to use the Graphical User Interface (GUI) by means of the touch, the keyboard, or both simultaneously.

## **PR - 100 words**

ALBEDO telecom announces all instruments (including AT-2048, Net.Shark, Net.Hunter, Net.Storm, Ether.Giga, Ether.Sync, Ether.Genius) will adopt the touch-screen technology. From now on new customers will be able to choose at any time the use of the Graphical User Interface (GUI) using (a) the touch, (b) the keyboard, (c) a mouse directly connected to the computer (d) a mouse using the Remote Interface by VNC. The existing customers using ALBEDO hand held instruments will also benefit of this new achievement because they will be able to use the mouse with a simple software upgrade.
