xGenius

PR - 25 words

Tester designed to turn-up telecom of Substations, LTE / 5G, Transport… thanks to its features on Ethernet/IP, PTP, T1/E1, Datacom and One-way delay test.

PR - 50 words

Multi-technology tester to install and maintain networks up to 10 Gb/s. It includes all the features needed in Ethernet optical/electrical transmission and PTP/SyncE synchronization. It also provides full T1/E1/E0/Datacom support while the C37.94 interface and One-way Delay makes it ideal for Power Utilities.

PR - 100 words

Advanced tester equipped with a large capacitive screen suitable for labs and field operations. The unit is able to test Ethernet/IP networks up to 10Gb/s while supports Sync-E/PTP protocols with Master/Slave emulation. Performance and Quality tests are possible at all opt/elect interfaces including GbE/T1/E1/E0/C37.94 and Datacom. The One-way delay GPS assisted is good for Substations maintenance and it has a built-in Rubidium oscillator to continue working perfectly in holdover mode.
